Vobal Technologies provides integrated VoIP solution to Global Marine Networks flagship product

Evanston, IL, November 8, 2011. Vobal Technologies today announced a newly formed strategic partnership with Global Marine Networks (GMN) to integrate Vobal's industry-leading Voice over IP (VoIP) services with the GMN satellite network management system including the webXaccelerator (WXA) satellite router.

Customers of the GMN wXa-503 with VOIP will be able to use Vobal-powered VoIP services over VSAT, FleetBroadband standard IP connections, or switching between both. "Vobal's highly-regarded VoIP back-end provides an incredibly clear voice connection for a fraction of the bandwidth required by standard VoIP solutions and expands the VoIP calling market to FleetBroadband connections," stated Luis Soltero, CTO of GMN.

Vobal Technologies leverages more than a dozen years of expertise in VoIP services to deliver a patented high quality, low-cost VoIP Solution over mobile satellite systems. Vobal has designed its leading-edge VoIP solution based upon extensive experience in many of the world's most technically challenging operating environments. Vobal's highly efficient network provides excellent calling clarity for a total overhead of less than 6kbps per call, on average, providing up to 25 minutes of talk time using only a single megabyte of data. Vobal Founder/CEO John Nix said: "Vobal's entire solution was designed from the ground up to optimize usage of the most precious data commodity out in the middle of the ocean: bandwidth."

"GMN has a rapidly growing customer base and an excellent reputation as the leaders in advancing satellite data services. By adding Vobal's VoIP services to the wXa product line, GMN provides its customers with the ability to significantly enhance crew welfare while still maintaining a reasonable cost basis for the vessel operator," added Vobal VP of Sales, Walter Kane.

About Vobal Technologies, LLC

Vobal Technologies' VoIP technology has enabled dozens of leading wireless carriers, broadband service providers, and satellite communications companies to offer powerful, differentiated VoIP enabled services while improving subscriber profitability. Vobal Technologies' team has built a reputation as a global leader in the development and delivery of these low cost, high quality solutions.
